SUMMARY

I am a passionate software professional with **2 years of experience** spanning across frontend development and software testing.

My dual expertise allows me to not only build beautiful, responsive user interfaces, but also ensure they are robust and bug-free through comprehensive automated testing and manual testing strategies. I enjoy building high-quality software that meets the needs of users.

EXPERIENCE

PT Sandbox Indonesia Juara – Klaten, Central Java, Indonesia

Software Tester (Feb 2024 – Present)

- Created functional and non-functional test plans
- Created positive and negative test cases
- Executed tests using an end-to-end testing approach
- Studied and analyzed functional and technical aspects of user stories to identify effective test plans and test cases
